A listing of the plants, trees and shrubs found in the restored formal garden at

THE KING'S GARDEN at FORT TICONDEROGA

The King's Garden at Fort Ticonderoga is a 1920's era formal display garden designed by leading landscape architect Marian Coffin. The garden is surrounded by a brick wall designed in 1912 by Alfred Bossom, the architect of the restoration of the Fort, and adjoins the Pavilion, a Greek Revival-style former hotel and vacation home on the shore of Lake Champlain. The Garden is a mixture of annuals, perennials, trees, shrubs and heirloom varieties of plants situated in the greater Pavilion Landscape which includes views of the lake, a historic apple orchard, vegetable gardens and more.

The Garden is open June 1-October 12, 2009 for visitors, 9:30 – 5. Admission to the King's Garden is included with general Fort admission and can be scheduled as part of a group tour package. Tours are available or visitors can explore the Garden and Pavilion Landscape on their own.
